*Dennis V. Mordan, PE, SECB
Promoted to Principal at
O'Donnell & Naccarato*

Philadelphia, PA: O'Donnell & Naccarato, a Philadelphia-based consulting structural engineering, parking consultation and project management firm, is pleased to announce Dennis Mordan as Principal in the firm. Having begun his career as a structural engineer in 1988, Mr. Mordan has been an employee of O'Donnell & Naccarato, Inc. (O&N) for more than 17 years.

Mr. Mordan was promoted to Project Executive in 1998, where he oversaw the design of many projects including healthcare facilities, commercial structures, educational buildings and more. One notable project was Teknion Corporation's U.S. headquarters, located in Mt. Laurel, NJ, a 4-year, 92,000 SF project with unique structural features such as conical turrets, irregular angles, as well as a glass cylindrical tower containing four circular conference rooms. Mr. Mordan also managed the structural design of The National, a major residential complex located in Old City, Philadelphia. This project incorporated 134,000 square feet of residences in three new hi-rise, loft-style buildings and the adaptation of a four-story commercial building for residential use and related structured parking areas. The Moravian is another notable project on Dennis Mordan's resume. Located above the historic Old Original Bookbinder's restaurant in Philadelphia, PA, this new seven-story, 54,000 SF condominium complex involved a retrofit of several historic buildings, construction of a new, connected residential tower and sensitive restoration of a historic façade.

Most recently, Mr. Mordan was promoted to Director of Engineering Operations in 2005. As Director of Engineering Operations, Mr. Mordan expanded his responsibilities to include managing, supporting and assessing the organization's needs, as well as designing, implementing and evaluating programs and procedures that facilitate efficiency, client service and the professional development and continuous learning of O&N project teams.

Mr. Mordan joins Principals Nick Cinalli, PE, SECB; Anthony Naccarato, PE, SECB; Mark Lunden, PE, SECB; and Margaret Hart in leading O'Donnell & Naccarato into the future. Nick Cinalli, President & CEO of O&N comments, "I am personally very excited about Dennis' transition to Principal here at O&N. I have worked with Dennis for the past 17 years and have watched him grow into a well-respected member of the engineering community. We are fortunate to welcome him on the management team that will continue to lead O&N into new directions."

O'Donnell & Naccarato finalized its ownership transition in 2004. The ownership of O'Donnell & Naccarato was legally turned over to the current Principals, as well as every employee by way of a partial Employee Stock Ownership Plan (ESOP). The firm has thrived under this new ownership, unifying every employee-owner in the firm, generating a shared sense of responsibility and pride in the workplace. Previous to the transition, the firm had been owned by the two founding Principals, Bill O'Donnell and Pete Naccarato. Dennis Mordan's new role as Principal will include growing O'Donnell and Naccarato's expanded scope in its four main divisions: Structural Engineering, Project Management, Parking Consultation and Façade Restoration. These departments operate within four offices located in Philadelphia, PA, Princeton, NJ, Lehigh Valley, PA, Washington DC and with affiliates in West Palm Beach and Orlando, FL.

Mr. Mordan graduated from Villanova University in 1988 with a Bachelor of Science degree in civil engineering with a concentration in structural engineering. He is certified in the practice of structural engineering through the Structural Engineering Certification Board (SECB) and is a registered Professional Engineer. His work has been honored with awards from many prestigious organizations, including the Delaware Valley Chapter of the American Concrete Institute, Concrete Construction Committee of Philadelphia, Villanova University and more. Dennis Mordan maintains professional affiliations with the American Society of Civil Engineers (ASCE), Delaware Valley Association of Structural Engineers (DVASE), Chi Epsilon Civil Engineering Honor Society and the Villanova Engineering Alumni Association. He lives in Bensalem, Pennsylvania and has a son, Tristen, age 8.

O'Donnell & Naccarato, a 120-member firm, provides consulting structural engineering and professional project management services. For more than 50 years the firm has been recognized among owners, architects, developers and contractors as an engineering and project management organization committed to professionalism and excellence. In O'Donnell & Naccarato, clients find a partner who can accurately evaluate situations and deliver innovative and cost-effective solutions. Headquartered in Philadelphia, PA, it has offices in Bethlehem, PA; Princeton, NJ; Washington, DC; West Palm Beach, FL; and Orlando, FL.
