FAIRFAX STRUCTURAL ENGINEERING FIRM CHANGES NAME TO O'DONNELL & NACCARATO

(Fairfax, VA) — Advance Engineers/O'Donnell & Naccarato, a Fairfax-based consulting structural engineering firm, has officially changed its name to O'Donnell & Naccarato. The name was modified to better reflect both the firm's ownership and its breadth of services.

O'Donnell & Naccarato, Washington, DC, is one of four offices operated by Philadelphia-based O'Donnell & Naccarato, a 50-year-old consulting structural engineering firm.

O'Donnell & Naccarato annually designs projects with construction values exceeding \$3 billion, and has developed a reputation for innovation; for example, as an early adopter of building information modeling (BIM).

"We wanted the name of our Washington office to signal a clear sense of our capabilities," said Nick Cinalli, president and CEO, O'Donnell & Naccarato. "The new name underscores that the region's building community will benefit from the depth of expertise that a 110-person firm can manage."

The name change follows O'Donnell & Naccarato's 2004 purchase of Advance Engineers Ltd. Since then, under the leadership of Sean Kennedy and Tony Beale, the regional office of O'Donnell & Naccarato has demonstrated steady growth, managing a range of projects in the Washington, DC area. For example, the firm provided structural engineering services for Arlington Mills, a 203-unit residential complex in Arlington, VA, and the \$43 million renovation and expansion of South Lakes High School in Fairfax County.

Overall, the Philadelphia-based parent company continues to complete high-profile structural engineering projects throughout the mid-Atlantic, such as the Capital Health System Replacement Hospital, a state-of-the-art, one-million-square foot hospital in Hopewell Township, NJ
